

Dear patients, friends and colleagues,

Our national, state and regional health officials are working to slow the spread of COVID-19, and every organization plays a role in protecting people who can have serious complications from this virus.

Advanced Regenerative Medicine has chosen to lead by example and will be temporarily closing to public access this Thursday, March 26th for "18 days of Social Distancing" **However, our team will be checking messages throughout in order to answer questions and schedule appointments. Please call us! 208-887-6791.**

We are acting as medical professionals and community leaders and beg you all to stay home immediately and practice social distancing. I am encouraging other non-essential business to also follow the CDC and National guidelines and close to the public. If we all do it at the same time, we can rapidly reduce the cases. If we do not act quickly, the medical providers, supplies and equipment will be exhausted.

The best way to help is to not become the problem. Support your small businesses with online purchases or take-out. If we stick together and follow the State/Federal guidelines, we can help end this quickly in our community.

Although we do not know how long this might last, we are hoping to re-open services on April 13th. We are rescheduling & booking appointments now to offer maximum flexibility and convenience to our patients.

Let's all pull together and keep each other safe.

Sincerely,

Advanced Regenerative Medicine of Idaho
